- Jeffrey M. Wooldridge, 2010. "Econometric Analysis of Cross Section and Panel Data," MIT Press Books, The MIT Press, edition 2.

Objectives: Empirical research in microeconomics, with emphasis on three main sub-fields: labor economics, public economics, and industrial organization. Focus on current empirical research in these areas and student independent analysis of current research using statistical software. Same as Economics 411, but additional work required.

Prerequisites: An undergraduate-level understanding of probability, statistics, and linear algebra is assumed. Economics 208D or 608D are required.

Grading Policy: Assignments (60%), Presentation (10%), Final Project (40%).

Class Policy:

- Strict academic honesty policy is expected.
- Regular attendance is essential and expected.
- Be on time!
